CASE STUDY 06 · CONFIDENTIAL CLIENT ENGAGEMENT

Regulatory gap assessment across a multi-jurisdiction group

A single view of regulatory gaps across a financial services group with entities in the UK, the US and Africa.

CLIENT SECTOR Financial services group: UK, US and African entities	MY ROLE Gap assessment and remediation planning
WORKED WITH Group risk committee, board and audit function	FOCUS Entity-level obligations and consolidated risk

The situation

Each entity reported on its own compliance, and the reports could not be compared. The board needed to see where obligations fell between entities.

What I did

1. **Obligation matrix**
   Each legal entity mapped to its regulatory obligations, including licence perimeter, data protection regime and reporting duties.
2. **Consolidated gap register**
   One register scoring every gap by likelihood and impact across the group.
3. **Control comparison**
   Duplicated controls, unaddressed gaps and inconsistent risk appetite across entities.
4. **Remediation roadmap**
   A prioritised plan with named owners and timelines, starting with the highest-impact gaps.

HOW I APPROACHED IT

I treated the group as one accountable structure, because gaps tend to sit where each entity assumes another has the obligation covered.

Similar work I take on

- Groups with entities in more than one jurisdiction
- Boards and audit committees needing one consolidated view
- Organisations entering a new jurisdiction

The client's name and working documents are withheld under confidentiality.
